○ Ishagoyal

Frontend Developer with over 5 years of experience designing, developing and maintaining front-end web applications in fast-paced environments.

TECHNICAL SKILLS

- **Programming languages /Framework**: **ReactJs, NodeJs, VueJs, Vuex, React Native, Redux**, **NextJS,** JavaScript, TypeScript, Cypress Testing, HTML, CSS, Web3Js, Starknet, **Tailwind**
- **Miscellaneous: Git,** Sublime Text, Visual Studio Code, KonvaJS, ThreeJS, Ant Design

EXPERIENCE

- **JediSwap, Frontend Engineer** *(July 2023 – Present)*
  - Developed JediSwap Missions interface that enables users to claim NFTs on Starknet(a zero knowledge-based Layer 2 network on Ethereum)
  - Used **starknet-react** library to interact with the blockchain, allowing the users to connect their wallet with the application, read the balance, and enable transactions.

- **Playment (Telus International AI Data Solutions), Senior Frontend developer** *(Dec 2019 – Feb 2023)*
  Creating and enhancing the world's data to enable better AI via human intelligence.
  - **GT Studio**: Developed a platform for managing data labelling operations, allowing the users to create and manage multiple projects, monitor annotators' performance, set up data annotation workflows, and invite team members to their organisation.
  - **Monorepo**: Improved developer experience by implementing a monorepo for frontend repositories, consolidating five repositories, and resolving merge and compatibility issues in shared code. Developed an extensive **React UI(Pixel)** component and assets library, facilitating sharing across all products.
  - **Annotation Tools**: Utilized konvaJS and thressJS to enhance canvas interactivity for the web application, building efficient annotation tools.

- **ClearGlass Analytics, Frontend Developer** *(March 2019 – Nov 2019)*
  A digital platform for asset owners to see all their investment costs in one place.
  - Played a part in developing the dashboard and many of its important features.
  - Primarily used technologies **VueJs, Vuex, TypeScript, and Cypress.**

- **Unifize Solutions Pvt Ltd, Frontend Developer Intern** *(October 2018 – January 2019)*
  A web and mobile-based industrial-grade communication platform

EDUCATIONAL PROFILE

Rajasthan Technical University, Kota	Poornima College of Engineering, Jaipur	2016	83.28%

HACKATHONS

- **ETHIndia 2023**: Created **GlassChain** platform redefines workplace social with our Web3 Glassdoor, ensuring tamper-proof and genuine reviews. Used **web3-react and ethers.js** to interact with the Ethereum smart contracts.
- **Starknet Hacker House 2023:** Created **TailTales** platform, an NFT game similar to **CryptoKitties on Starknet**.
  - In this, a user can mint a puppy, can breed a puppy, and has to perform a daily activity on them to keep the puppy alive. If the user does not do the activity the puppy will die and any user can burn the NFT and get rewards. Used **starknet-react** library to interact with the starknet blockchain.
